PROFESSIONAL SUMMARY

B.Tech (AI-ML) graduate with hands-on experience in Python, SQL, Machine Learning, and NLP. Skilled in building AI-driven solutions and data pipelines, with 2 peer-reviewed research publications. Seeking to contribute as a Fresher Generative AI Engineer.

EDUCATION

Dr. APJ Abdul Kalam Technical University

B.Tech, Computer Science Engineering (AI & ML) — 7.52 CGPA

May 2026

Lucknow, India

- Co-Organizer, GDG on Campus

EXPERIENCE

LLM Post-Training Intern

Ethara.AI

Jan 2026 – Apr 2026

Gurugram

- Conducted **post-training and fine-tuning** of large language models (LLMs) to enhance performance
- Enhanced model responses through **prompt engineering, evaluation, and alignment techniques**, improving user interaction quality
- Analyzed model outputs and **optimized performance** via iterative feedback loops, refining model accuracy

Data Science & ML Intern

Zidio Development

Jun 2025 – Oct 2025

Remote

- Conducted **EDA, data cleaning, feature engineering**, and built ML models to support data-driven decision making
- Evaluated ML models** with metrics and **optimized preprocessing pipelines** for enhanced model performance

Data Engineering & Visualization Intern

HCLTech

Oct 2024 – Mar 2025

Lucknow

- Designed and implemented **ETL pipelines** using Python for data ingestion and transformation
- Developed **star-schema data models** and data warehouse structures for analytical reporting
- Built interactive **Power BI dashboards** linked to structured data models, enabling data-driven decision-making

PROJECTS

AI NeuroAssist: Smart Communication System for Paralyzed Patients

2026

Python, Deep Learning | [GitHub](#)

- Developed an **AI-based assistive system** enabling paralyzed patients to communicate using multimodal inputs
- Integrated deep learning models for gesture/facial recognition and intent prediction; **published in IJRASET (April 2026)**

FusionNet: Multimodal Stress Detection Using Deep Learning

2025

Python, PyTorch, TensorFlow | [GitHub](#)

- Proposed a **late-fusion deep learning architecture** combining facial (ResNet18), audio (2D-CNN), and physiological (1D-CNN) encoders for stress classification
- Achieved 83% accuracy** on WESAD and DEAP datasets, outperforming unimodal baselines by 9–13%; **published in IJERCCE (Feb 2026)**

Fine-Tuned Python Coding Assistant: LoRA Fine-Tuning of a Small LLM

2026

Python | [GitHub](#)

- Fine-tuned Qwen2.5-0.5B-Instruct using **LoRA (PEFT)** on a Python instruction dataset to build a specialized coding assistant

CERTIFICATES / ACHIEVEMENTS

- 2 Peer-Reviewed Publications:** Research published in IJRASET (April 2026) and IJERCCE (Feb 2026).

TECHNICAL SKILLS

Languages: Python, SQL, C

Data Visualization: Power BI, Tableau, MS Excel, Matplotlib

Core Concepts: Machine Learning, Artificial Intelligence, Deep Learning, NLP, LLM, Model Fine-tuning, Generative AI

Frameworks/Libraries: TensorFlow, PyTorch

Databases: MySQL, ChromaDB

Tools: Git, GitHub

Soft Skills: Analytical Skills, Problem Solving, Communication, Teamwork, Data Handling
